UKRAINE

Sugar prices in Ukraine are growing because of the uncontrolled export, claims Alex Doroshenko, the director of Ukrainian association of suppliers to retail chains. The expert has noted that due to the shortage of domestic sugar after a while there arises a need to import cane sugar to Ukraine.

By the end of the week the sugar prices remain in the same price range: wholesale selling price is UAH 13750-14000/MT, as of March 3, 20163.
